Store locked up.

Dispose of contents/container to comply with local/regional/national/international regulations.

For industrial and commercial use only.  
For additional information, see Safety Data Sheet.

**ORGANIC ACID DETERGENT** is ideal for safely removing lime and scale buildup from machinery and tools, appliances, piping, and other surfaces made from metal, stone, tile, concrete, plastic, or glass. It cleans quickly without the fumes and other hazards of strong acids and is safe to use on almost all surfaces.

### DIRECTIONS

To remove heavy lime and rust apply **ORGANIC ACID DETERGENT** full strength. Allow to soak until deposits are dissolved or loosened, then rinse thoroughly with clean water. To clean, derust and delime painted surfaces, small parts and metals including stainless steel and aluminum, dilute 1 to 4 ounces per gallon. Soak or brush on, and rinse thoroughly when deposits are removed. As a glass rinse for removal of water spots, use 1 to 2 ounces in 4 gallons of rinse water.

### NFPA® Ratings

Health: 2; Flammability: 0; Reactivity: 0

### Contains/CAS Number:

Water (7732-18-5); Phosphoric Acid (7664-38-2); Linear Alcohol Ethoxylate (34398-01-1); Proprietary (Mixture); Solvent Yellow 094 (2321-07-5).
