DISPOSAL: Dispose of contents/container to comply with local/regional/national/international regulations.

WARNING:

This product contains, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity.

Alkaline pH Adjustment

ALKALINE pH ADJUSTMENT is the convenient liquid approach to raising the pH of pool water or neutralizing acidity. It works faster and more effectively than lime or soda ash without clouding pool or spa water.

DIRECTIONS

The amount of **ALKALINE pH ADJUSTMENT** required to raise the pH depends on the water's natural buffering capacity. Add 1 to 2 quarts directly to the pool at a point of strong agitation. Do not add to the skimmer or vacuum. Allow 15 to 20 minutes for thorough mixing, then retest the pH to see if it falls within acceptable limits (7.2 to 7.8). If pH tests less than 7.2, repeat application.
