DIRECTIONS FOR USE: Shake well before using. Wear rubber gloves. If cleaning a gas oven, do not spray on pilot light. Spread newspapers under oven door. Clean oven racks separately. May be used in either warm (200°F) or cold empty oven. Spray oven surfaces from a distance of 9 to 12 inches. Allow gel to work 5 to 10 minutes on warm surfaces, 10 to 20 minutes on cool surfaces. Then wipe clean with a wet cloth, sponge or paper towels. Rinse oven thoroughly with potable water. For heavily encrusted areas, repeat application using steel wool or soap pad. Pre-heat oven for 10 minutes before next use.

For overnight cleaning, use only in a cold oven. Spray the oven surfaces and close the oven door and allow to stand overnight. Then wipe clean with a wet sponge. Rinse thoroughly with potable water.
