**DIRECTIONS:** For best results, drains and grease traps should be treated daily at a time of low flow, to allow time for the bacteria and enzymes to work (usually at the end of the day or late at night). Use of a timed metering pump such as the ENZO-SNAKE PUMP ASSEMBLY will ensure maximum performance. Make daily additions of DYNASTY ENZO-SNAKE at a rate of 21 ounces for every 250 gallons of trap capacity.
