**DISPOSAL:** Offer empty container for recycling. If recycling is not available, discard container in trash.

**DIRECTIONS:** Drain as much water as possible from hydrant. Fill hydrant with **HYDRANT ANTI-FREEZE**, leaving air space below cover to allow liquid to expand and contract with changing temperatures. **HYDRANT ANTI-FREEZE** is a food grade material that will not contaminate potable water supplies, but treated hydrants should be rinsed thoroughly before the water is used for domestic purposes. **Undiluted HYDRANT ANTI-FREEZE** will protect hydrants down to -60°F.

*For industrial and commercial use only.  
For additional information, see Safety Data Sheet.*

**HYDRANT ANTI-FREEZE** is designed to prevent frost damage to exterior water hydrants. It is made with food grade ingredients to eliminate the possibility of contamination of potable water supplies. **HYDRANT ANTI-FREEZE** can also be used in radiators and all water cooled engines and can be tested with standard hydrometers.

**Diluted:** Use a 1:1 dilution ratio with water and **HYDRANT ANTI-FREEZE** will protect down to -25°F.

**NFPA® RATINGS:** Health: 0; Flammability: 1; Reactivity: 0

**INGREDIENTS/CAS #:**  
1,2-propanediol (57-55-6)

Please Recycle.
