May be fatal if swallowed and enters airways.

IF SWALLOWED: Immediately call a doctor, a POISON CENTER. Do NOT induce vomiting.

Store locked up.

Dispose of contents/container to comply with local/regional/national/international regulations.

In case of fire: Water spray, Carbon dioxide, Dry chemical powder.

For industrial and commercial use only.

For additional information see Safety Data Sheet.

NFPA® RATINGS:

Health: 1; Flammability: 1; Reactivity: 0

INGREDIENTS/CAS #:

Isoparaffinic Hydrocarbon/64742-47-8; Polydimethylsiloxane/63148-62-9; Alkanes, C14-16/90622-46-1

Please Recycle.

Canister made from 25% post-consumer recycled plastic.

TTOOLER

- Prevents rust and corrosion by preventing water from contacting your equipment.
- Safe for use on all metals.

TOOLER is a wipe which removes surface rust, grease, oil, and grime. Use **TOOLER** to clean and protect while leaving behind a long lasting barrier. Since water and water vapor will not penetrate this barrier, there is no way for rust to form. **TOOLER** is perfect for use on tools, machinery, parts or any metal surface where rust is a concern. Keep a tub of these towels in your maintenance area and wipe down all of your metal equipment before storing them for an extended period of time. By reducing the number of replacements you have to purchase, **TOOLER** will more than pay for itself!

GREAT FOR USE ON:

- Shovels • Rakes • Drills • Wrenches • Pliers • Jackhammers

Any exposed metal surface!

DIRECTIONS FOR DISPENSING:

Remove lid by lifting upward. Pull towel from center of the roll and thread through "X" from the underside of the lid. Close lid. Pull towel at 90° angle. Snap hinged cap back into place to ensure towels stay moist.

DIRECTIONS FOR USE:

Apply a thin film to repel non-visible moisture and prevent rust. Used regularly, these wipes can prevent rust on equipment thereby helping the equipment to function properly and extending life. For smaller jobs, simply cut wipes into the appropriate strip size.
