For industrial and commercial use only.

For additional information, see Safety Data Sheet.

WARNING: This product contains, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity.

INGREDIENTS/CAS#:

Perlite Ore (93763-70-3); Crystalline Silica Quartz/14808-60-7

NFPA® RATINGS:

Health: 2; Flammability: 0; Reactivity: 0

ZORBITALL

Zorbital is an all natural absorbent that will quickly absorb any liquid regardless of viscosity. Liquids such as gasoline, diesel fuel, brake and transmission fluids, glycols, paints, oils, solvents, and acids** to name but just a few. Absorption is complete with no slippery residue left behind. Once absorbed, liquids are held tightly, not allowing leaking or leaching into the environment. Zorbital is great for use in any industry.

****DO NOT use on Hydrofluoric Acid spills.**

DIRECTIONS: Dispense **Zorbital** in a circle around the spill to contain it. Use enough material to create a solid wall all the way around. Using a stiff bristled broom work the **Zorbital** slowly from the outside of the circle into the center. Allow the product time to absorb the liquid. Work the product back and forth with a swirling motion until surface is dry. Sweep up absorbant and place in a suitable container for disposal. Disposal of waste must be done in accordance with all applicable regulations.

Please Recycle.
