

METERED INSECTICIDE

Insecticide for Metered Spray System

Form: Aerosol Liquid

Color: Clear

Odor: Insecticide

pH: N/A

Solubility (in water): Insoluble
(in mineral spirits): Soluble

VOC Content (% by weight): 35%

Flash Point (ASTM D-7821): 142°F

Specific Gravity: 0.82 g/cm³

Density: 6.84 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients

C.A.S.

Hydrotreated light petroleum distillates.....	64742-47-8
N-Butane (propellant)	106-97-8
Propane (propellant).....	74-98-6
N-Octyl bicycloheptene dicarboximide	113-48-4
Piperonyl butoxide	51-03-6
Pyrethrins	8003-34-7

Ideal for controlling...

- **Gnats**
- **Flies**
- **Mosquitoes**
- **Other Common Insect Pests**

Use In...

- **Commercial food service and preparation areas of milk houses, hospitals, hotels, motels, factories, stores, ships, clubs, restaurants, and schools.**

DIRECTIONS: Install dispenser at a distance of seven (7) feet from the floor and where air currents will carry spray throughout the room. Remove protective cap and place can in dispenser and make any adjustments necessary to dispense a dose every 15 minutes. The effectiveness of the insecticide will be noticeable within one hour after the dispenser is activated. With continuous treatment, within 24 hours the area should be relatively free of small flying insects. With continued use, their annoyance should be greatly diminished. Factors such as air flow rate, size of space treated, humidity and room temperature all affect insect activity and control. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

Coverage: 6,000 cubic feet of space.

Dispenses: 3,400 “shots” per can.

Duration: 35 days (850 hours) on around-the-clock basis.
